IF YOU THINK A PLANT IS GIANT HOGWEED

1. Protect yourself:
   Do not touch it. Skin exposed to giant hogweed sap and sunlight can be severely burned. If it touches your skin, immediately wash with water and soap and protect the area from sunlight for 48 hours. Do not use a mower or stringweeder to cut down.

2. Identify: Look at photos at Virginia Department of Conservation and Recreation:
   [www.vainvasivespecies.org](http://www.vainvasivespecies.org) or and at Virginia Tech’s [www.forestupdate.frec.vt.edu/content/dam/forestupdate_frec_vt_edu/newsletter/archives/2011/hogweed.pdf](http://www.forestupdate.frec.vt.edu/content/dam/forestupdate_frec_vt_edu/newsletter/archives/2011/hogweed.pdf)

3. Report:
   Send photos for confirmation to your local Extension office. Or contact the VCE-Prince William Extension Horticulture Help Desk:
   master_gardener@pwcgov.org
   (703)792-7747
   Or come-by our office:
   M-F 8am-5pm
   8033 Ashton Avenue, Suite 105
   Manassas, VA 20109

<tbody>
<tr>
<td><strong>LEAF</strong></td>
<td>Compound, lobed, deeply incised, up to 5 feet wide</td>
<td>Compound, less incised than hogweed, between 2 to 2.5 feet wide</td>
<td>Bright green, small and fern-like, may appear glossy</td>
<td>Pinnately compound, each leaflet is ovate in shape and up to 4” long.</td>
<td>Green to Blue – green compound, up to 5 feet long; leaflets are 2 to 4 inches long</td>
</tr>
<tr>
<td><strong>FLOWER</strong></td>
<td>White umbrella-shaped flower clusters up to 2.5 feet wide</td>
<td>White flat-topped flower clusters no larger than 1 foot wide</td>
<td>Small and white arranged in numerous flat-topped clusters on all branches</td>
<td>Greenish-yellow and are clustered together.</td>
<td>White and quite small, borne on 12 to 18 inch clusters at the ends of branches</td>
</tr>
<tr>
<td></td>
<td>Flowers in late June — Mid July</td>
<td>Flowers in late May — late June</td>
<td>Flowers late May — late June</td>
<td>Flowers July - September</td>
<td>Flowers late summer</td>
</tr>
<tr>
<td><strong>STEM</strong></td>
<td>Green with purple splotches and coarse white hairs - thick circle of hairs at base of leaf stalk</td>
<td>Green and ridged with fine white hairs</td>
<td>Smooth and waxy stem with purple blotches (no hairs or bristles)</td>
<td>Appears reddish</td>
<td>Very stout and spiny, gray to straw colored</td>
