

PRINCE WILLIAM 4-H

Embryology Project

Project

“The Beginning of Life” 4-H Project is designed to help youth obtain a better understanding of life and embryonic development. 4-H educational materials guide students through each step of the hatching process from preparing the eggs for incubation to building a brooder for the newly hatched chicks. Educational material address Virginia SOLs for math, science, English, life science, and computer technology. Prince William 4-H provides fertilized eggs, guides participants through training, supports participants during the hatch, and then collects the chicks to be sent to a local farm.

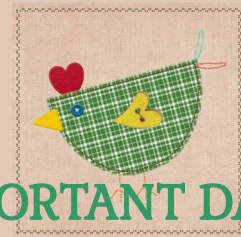

Prince William 4-H Clubs, Prince William County Schools, Manassas City and Manassas Park Schools, and Homeschool Groups are invited to participate in this exciting 4-H project!

Registration opens December 1st!
