The Department of Development Services, Fire Marshal’s Office, Department of Public Works, Neighborhood Services Division, and the Health Department are proud to support the International Code Council in observing Building Safety Month 2024. Advocating the need for the adoption of modern, regularly-updated building codes helps residents, businesses and visitors understand what it takes to create safe and sustainable structures. All communities need building codes for protection from everyday disasters like fires, weather-related events such as floods, and structural collapse that follows deterioration over time of buildings of all kinds. Model building codes adopted and enforced by well-trained, professional code officials are society’s best way of protecting each other.
