### The Prince William Health District What You Should Know:

#### CDC Endorses ACIP's Updated COVID-19 Vaccine Recommendations

- **Centers for Disease Control and Prevention (CDC) is endorsing updated recommendations** made by the Advisory Committee on Immunization Practices (ACIP) for the prevention of COVID-19, expressing a clinical preference for individuals to receive an mRNA COVID-19 vaccine over Johnson & Johnson's COVID-19 vaccine.
  - ACIP's unanimous recommendation followed a robust discussion of the latest evidence on vaccine effectiveness, vaccine safety and rare adverse events, and consideration of the U.S. vaccine supply.
  - The U.S. supply of mRNA vaccines is abundant – with nearly 100 million doses in the field for immediate use. This updated CDC recommendation follows similar recommendations from other countries, including Canada and the United Kingdom.
  - Given the current state of the pandemic both here and around the world, the ACIP reaffirmed that **receiving any vaccine is better than being unvaccinated**. Individuals who are unable or unwilling to receive an mRNA vaccine can continue to have access to Johnson & Johnson's COVID-19 vaccine.
- **Getting vaccinated and getting a booster dose when you are eligible is still the best way to protect yourself from COVID-19 and prevent severe disease, hospitalization, and death.**
  - If people have questions about which vaccine is best for them, they should talk to their healthcare provider.
