The Prince William Health District What You Should Know:

Virginia Department of Health Urges Virginians to Get the Flu Vaccine

Although flu activity remains low nationally, Virginia has started to see sporadic reports of the influenza virus detected in recent weeks. December is not too late to get your flu vaccine! While the flu season may vary from year to year, cases often peak in January or February and continue through May.

A flu vaccine is needed every season for two reasons:

- First, the body's immune response from vaccination declines over time, so an annual vaccine is needed for optimal protection.
- Second, because flu viruses are constantly changing, the formulation of the flu vaccine is reviewed each year and updated to keep up with changing flu viruses.

To minimize your risk of contracting or transmitting the flu, follow these simple steps:

- Get vaccinated;
- Wash your hands frequently and thoroughly, for at least 20 seconds;
- Cover your cough, either by using a disposable tissue or coughing into your sleeve, not your hand; and
- Stay at home when you are sick.

Visit www.vaccines.gov/find-vaccines/ to find a location near you to get the flu vaccine. It is safe to get both the flu and COVID-19 vaccine at the same time.

Community Vaccination Center and Manassas Mall

*Appointments for adolescents and adults are highly recommended.
Appointments are required for 5-11 year olds.*
