The Prince William Health District What You Should Know

Self-Testing At Home or Anywhere

Self-tests for COVID-19 give rapid results and **can be taken anywhere**, regardless of your vaccination status or whether or not you have symptoms.

- They detect **current** infection and are sometimes also called “home tests,” “at-home tests,” or “over-the-counter (OTC) tests.”
- They give your **result in a few minutes** and are different from laboratory-based tests that may take days to return your result.
- Self-tests along with [vaccination](#), [wearing a well-fitted mask](#), and physical distancing, help [protect you and others](#) by reducing the chances of spreading COVID-19.
- Self-tests **do not** detect antibodies which would suggest a previous infection and they do not measure your level of immunity. Free tests are also available through [local health departments](#). **Order free tests** at [COVIDtests.gov](https://www.cdc.gov/covidtests)
- **Buy tests** online or in pharmacies and retail stores. Private health insurance may reimburse the cost of purchasing self-tests. Visit [FDA's website](#)

The Prince William Health District Community Testing Center (CTC) Hosted by Prince William County, and Operated By Ashbritt, IEM Health Located At 7 County Complex Court is Now Closed
